Dear Potential Garden Sponsor,

The Martin County Fair Association, Inc. has started a year-round educational garden.

My FAIR Garden will focus on urban gardening techniques, promoting different pollinators, as well as food sustainability solutions for healthy home-based gardens.

Youth will participate through Martin County's 4-H Junior Master Gardeners with hands on educational activities and S.T.E.M based workshops revolving around the resources we have in our garden. They will also participate by helping with maintaining the garden on a year-round basis. During fair time they will help be the voice in educating the public on plants/herbs/vegetables/fruits that we have in our garden and how they might grow them at home or what the purpose of that specific plant is.

Our pollinator gardens will incorporate different fruit and vegetable plants to include herbs, edible flowers, and pollinator nectar plants. We are striving for our garden to be a sensory experience in taste, touch, and smell along with beneficials for pest management.

With rising food costs and food desert challenges we, the Fair Association, thought it was time to start being an advocate within our community. Through partnerships with our local 4-H Jr. Master Gardeners and Extension Master Gardeners we will be able to maintain our garden once operational. However, we hope that we can count on our local business partnerships to fund our garden either in monetary or in-kind donations. Enclosed for your convenience is a sponsor package, you will note there are varying levels of sponsorship and corresponding benefits available for your consideration.

Your commitment to our endeavors will make the difference between just a garden and an educational FAIR GARDEN on behalf of the community that we serve.

Highest Regards,
